Points of Interest

CPVC residential sprinkler pipe has very detailed installation instructions that are outlined in the manufacturer's installation manuals. At **Arbor Place of Lisle** (right) 1 1/4" pipe is used in many residential units. The installation manual requires that hangers be spaced no further than five feet apart from drop T's in this size piping. In this picture the hangers on the vertical truss members are greater than five feet apart. For this situation to comply a threaded rod hanger was installed. The system is also required to be braced against upward movement because it operates at 100psi or greater.
